

# Coronavirus Workplace Risk Assessment

Prepared for ALL STAFF

Date September 2020

Employers have a duty of care to assess the risk of Covid-19 to their workforce as well as to visitors to the premises, cleaners and external visiting suppliers and contractors. This assessment will identify the control measures that should be put in place to reduce any risk, protect employees and other people from the risk of coronavirus infection.

Other risk assessments will be required in conjunction to assess for other types of risk in the workplace.

**Assessor:**

**Job Title:**

**Assessment Date:**

**Business Unit/Location Assessed:**

**Review Date:**

Preventing the spread of Covid-19 infection, Cleaning and Staff Safety					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<p>People can catch the virus from others who are infected in the following ways:</p> <ul style="list-style-type: none"> <li>• virus moves from person-to-person in droplets from the nose or mouth spread when a person with the virus coughs or exhales</li> <li>• the virus can survive for up to 72 hours out of the body on surfaces which people have coughed on, etc</li> <li>• people can pick up the virus by breathing in the droplets or by touching contaminated surfaces and then touching their eyes or mouth</li> </ul>	<p>Ensure that the organisation complies with its duty to provide a safe and healthy workplace/working conditions for staff in the workplace during the coronavirus pandemic by:</p> <ul style="list-style-type: none"> <li>• Circulating “COVID secure” coronavirus policies and safety procedures to all staff and managers; these set out how staff should behave and the precautions they must adopt during the pandemic to keep them safe</li> <li>• Requiring staff to practice effective social distancing while in and around the workplace, while travelling to work and in all work business</li> </ul> <p>Managers should pass on and reinforce key Government public health messages to all staff:</p> <ul style="list-style-type: none"> <li>• cover the mouth and nose with a tissue or sleeve (not hands) when coughing or sneezing (Catch it — Bin it — Kill it)</li> <li>• put used tissues in the bin straight away</li> </ul>

	<ul style="list-style-type: none"> <li>• wash hands regularly with soap and water for at least 20 seconds (use hand sanitiser gel if soap and water are not available). Provide appropriate facilities, signage, soaps and emollient creams</li> <li>• Educate employees regarding the test and trace system, that employees understand that they must isolate if they live with someone with symptoms, live with someone who tests positive, have symptoms themselves or are told to isolate by the test and trace service</li> <li>• clean and disinfect frequently touched objects and surfaces</li> <li>• do not touch face, eyes, nose or mouth if hands are not clean</li> </ul> <p>In all departments, fully implement Public Health England (PHE) <i>Guidance for Employers and Businesses on Coronavirus</i>, including the following key safety precautions:</p> <ul style="list-style-type: none"> <li>• Keep local/departmental risk assessments under review to ensure that a safe place of work is maintained</li> <li>• Consult with staff and staff representatives – fully involve the workforce at all stages of the pandemic</li> <li>• Make any adjustments to the workspace/rotas/work patterns/ procedures necessary to facilitate effective infection prevention and social distancing at work</li> <li>• Follow government health and travel advice</li> <li>• Provide hand sanitiser as required</li> <li>• Provide infection control personal protective equipment (PPE) such as gloves, masks and eye protection if required in individual risk assessments and method statements, e.g. cleaning</li> <li>• Increase environmental cleaning in the workplace; review and revise cleaning method statements and schedules and ensure cleaning staff have access to suitable detergents, disinfectants and PPE</li> <li>• Provide additional waste removal facilities and more frequent rubbish collection</li> <li>• Display appropriate public health posters and notices around the workplace and on websites</li> <li>• Employees should be asked not to make drinks or fetch items for other people</li> <li>• Restrict numbers in the office at any time</li> <li>• Reduce number of desks and space them well</li> <li>• Consider use of shared soaps and towels – what risks arise?</li> <li>• Staff are not required to wear face coverings while at work but may do so if they wish, consider providing these to your staff for use at work for their journey to work</li> </ul>
--	---

	<ul style="list-style-type: none"> <li>Consider screening areas on and in between desks and reception areas, door handles on doors to avoid opening with hands</li> </ul>
--	---

Homeworking, Hotdesking and Equipment Sharing					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<ul style="list-style-type: none"> <li>Sharing desks and equipment whilst hotdesking presents an infection hazard</li> </ul>	<p>Homeworking should be adopted within the organisation as the preferred method of work wherever possible and only staff who need to be on-site should attend workplace premises</p> <p>The following working arrangements will be put into place to support homeworking:</p> <ul style="list-style-type: none"> <li>Managers will plan for the minimum number of people needed on site to operate safely and effectively</li> <li>Departmental and line managers to review all staff job roles in order to facilitate and encourage homeworking wherever appropriate</li> <li>Homeworking policies to be reviewed to ensure that sufficient support is provided to homeworkers</li> <li>Managers should monitor the wellbeing of people who are working from home and put in place measures to support their mental and physical health and personal security</li> <li>Enhanced IT support to be provided to homeworkers to ensure the effectiveness of working arrangements and the security of information and data, for example, remote access to work systems</li> <li>Arrangements should help homeworkers to stay connected to the rest of the workforce as appropriate</li> <li>Hot-desking will not be supported at this time</li> <li>Equipment should not be shared between staff – limit use of high-touch equipment in the workplace, e.g. whiteboards, pens, etc</li> </ul>

Workplace Social Distancing					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<ul style="list-style-type: none"> <li>In which areas, environments and situations may social distancing not be possible?</li> </ul>	<p>Staff are required to practice effective social distancing while in and around the workplace, while involved in work activities and when travelling to and from work, whenever possible, by:</p> <ul style="list-style-type: none"> <li>Avoiding non-essential contact with others</li> <li>Keeping a safe distance of at least 2 metres (about 3 steps) from others whenever possible</li> <li>Avoiding physical contact (e.g. hugs, handshakes, etc)</li> </ul> <p>Adaptations to the premises to support social distancing should include:</p> <ul style="list-style-type: none"> <li>A review of all work premises to identify suitable adaptations which will support social distancing</li> <li>Offices and workspaces to be set up to support social distancing, e.g. layout changes, appropriate signage, stickers and floor markings to denote safe distances, etc</li> <li>Workstations and desks to be arranged with a minimum separation between them – where necessary screens will be fitted</li> <li>Establishing maximum occupancy limits for offices and work areas</li> <li>Reducing the need for staff to move around within the workplace</li> </ul> <p>Adaptations to work processes to support social distancing will include:</p> <ul style="list-style-type: none"> <li>Cancelling non-essential meetings</li> </ul>

	<ul style="list-style-type: none"> <li>• Holding essential meetings in well ventilated rooms with appropriate social distancing in place – limit numbers to essential members only and use phone/video conferencing, etc</li> <li>• Replacing face-to-face meetings wherever possible with video conferencing, phone conferencing, etc</li> <li>• Holding meetings outdoors</li> <li>• Providing hand sanitiser at meetings</li> <li>• Cancelling non-essential training and all face-to-face training/recruitment practices</li> <li>• Carrying out any essential training/ recruitment by using email/online e-learning wherever possible rather than bringing people together face to face</li> </ul> <p>Managers should display notices in all premises reminding staff of the key infection prevention requirements, including the need to maintain safe distancing</p> <p>Where social distancing guidelines cannot be followed in full, in relation to a particular activity, managers must carry out further risk assessments and consider whether that activity needs to continue for the business to operate - where such activities need to continue appropriate mitigation methods should be put into place, such as:</p> <ul style="list-style-type: none"> <li>• Increased hand washing</li> <li>• Increased environmental cleaning</li> <li>• Keeping the activity time involved as short as possible</li> <li>• Reducing the number of people each person has contact with by using “fixed teams or partnering” (so each person works with only a few others)</li> </ul> <p>Where social distancing is not possible, the following measures should be taken:</p> <ul style="list-style-type: none"> <li>• considering whether an activity needs to continue for the business to operate</li> <li>• keeping the activity time involved as short as possible</li> <li>• using screens or barriers to separate people from each other</li> <li>• using back-to-back or side-to-side working whenever possible</li> <li>• staggering arrival and departure times</li> <li>• reducing the number of people each person has contact with by using ‘fixed teams or partnering’</li> </ul> <p>Review specific industry guidance according to your type of workplace/industry:</p> <p><a href="https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19">https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19</a></p>
--	--

Higher Risk Areas of the Workplace e.g. toilets, staff rooms, restrooms, changing areas					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<p>Heavily used areas of the workplace are more likely to present an infection transmission risk</p> <p>Essential for staff to wash hands regularly but also that toilets are kept clean and free of coronavirus contamination</p> <p>A number of staff going to the toilet together may compromise their ability to comply with social distancing</p> <p>Increased risk of people coughing and touching door handles, taps and toilet flush handles</p>	<p>Ensure higher-risk high-traffic areas of the workplace are COVID-secure by applying appropriate safety precautions, including:</p> <ul style="list-style-type: none"> <li>• Stressing the need for staff to follow good hygiene practice at all times while at work (i.e. regular handwashing, using tissues and disposing of them appropriately, etc</li> <li>• Managers ensuring that adequate hand cleaning resources are provided; all staff toilets to be supplied with adequate supplies of hot water, liquid soap and paper towels</li> <li>• Printing handwashing instructions/posters and displaying throughout workplace, especially in toilets <a href="https://www.nhs.uk/live-well/healthy-body/best-way-to-wash-your-hands/">https://www.nhs.uk/live-well/healthy-body/best-way-to-wash-your-hands/</a></li> <li>• Limiting numbers of staff who can use high traffic areas such as corridors, stairs, toilets and restrooms at any one time to ensure social distancing – consider a one-way system if possible, to avoid passing in corridors</li> <li>• Limiting lift occupancy</li> <li>• Monitor high-traffic area use and regulate access as necessary</li> <li>• Prioritise disabled use where necessary, e.g. disabled toilet use, use of lifts, etc</li> <li>• Staggering breaks to ensure that restrooms and toilets are not overloaded</li> <li>• Establishing safe queuing systems by use of room occupancy limits and floor markings/signage, etc</li> <li>• Placing 70% alcohol hand gels at convenient places around the workplace with instructions for use</li> <li>• Increasing environmental cleaning, especially in and around toilets/washrooms and staff rooms; special attention to be paid to frequently touched surfaces such as door handles, toilet flush handles, light switches</li> <li>• Increasing toilets/washrooms inspections to check for cleanliness/adequate stock of soap/toilet paper, etc</li> </ul>

	<ul style="list-style-type: none"> <li>Where possible, providing paper towels as an alternative to hand dryers in handwashing facilities</li> </ul>
--	---

Vulnerable and Extremely Vulnerable Staff e.g. those with pre-existing medical conditions					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<p>Those who are classified by PHE as being at greater risk from COVID-19 include people in the vulnerable (moderate risk) and extremely vulnerable (high risk) categories</p> <p>Vulnerable (moderate risk) people include those who:</p> <ul style="list-style-type: none"> <li>are 70 or older</li> <li>are pregnant</li> <li>have a lung condition such as asthma, COPD, emphysema or bronchitis (not severe)</li> <li>have heart disease, diabetes, chronic kidney disease or liver disease (such as hepatitis)</li> <li>are taking medicine that can affect the immune system (such as low doses of steroids) or</li> <li>are very obese</li> </ul> <p>Extremely vulnerable (high risk) people include those who:</p> <ul style="list-style-type: none"> <li>have had an organ transplant</li> <li>are having chemotherapy for cancer, including immunotherapy</li> <li>are having an intense course of radiotherapy for lung cancer</li> </ul>	<p>The following safety and staff health arrangements should apply to staff who are classified as vulnerable (moderate risk) or extremely vulnerable (high-risk):</p> <ul style="list-style-type: none"> <li>Managers, human resources and occupational health departments should identify and be aware of staff who fall into vulnerable and extremely vulnerable categories so they can ensure that they are given adequate protection and support to enable them to comply with government health recommendations</li> <li>No member of staff in the extremely vulnerable “high-risk” category should be expected to come to work during the pandemic crisis or during recovery from the lockdown – these staff should be advised to follow government medical advice and stay at home</li> <li>Extremely vulnerable “high-risk” staff will be offered furlough arrangements - where it is possible or appropriate for them to safely work from home without risk this should be facilitated</li> <li>Staff in the vulnerable “moderate risk” category should be considered on a case by case basis – wherever possible they will be supported to work from home</li> <li>Staff in the vulnerable “moderate risk” category who cannot work from home and wish to return to work should be offered additional protection so that they can achieve effective social distancing</li> <li>Managers should stay in touch with vulnerable or extremely vulnerable staff who are staying at home by phone to ensure they are well and to prevent them from feeling isolated</li> <li>As they cannot leave their home at all, the organisation should help to provide additional support for any extremely</li> </ul>

<ul style="list-style-type: none"> <li>• have a severe lung condition (such as severe asthma or severe COPD)</li> <li>• are taking medicine that makes them much more likely to get infections (such as high doses of steroids)</li> <li>• have a serious heart condition and are pregnant</li> </ul> <p>The following PHE advice applies:</p> <ul style="list-style-type: none"> <li>• Those in the “high risk” (extremely vulnerable) category are subject to special “shielding” arrangements – they are advised to self-isolate and not leave home for any reason for at least 12 weeks</li> <li>• Those in the “moderate risk” (vulnerable) category are advised to stay at home as much as possible – they can go to work if they cannot work from home</li> <li>• People in both categories are advised by the government to be particularly stringent in complying with social distancing requirements</li> </ul> <p>Pregnant women are included in the “moderate risk” category as a precaution but are not considered by PHE to be more likely to get seriously ill from COVID-19</p> <p>There is some evidence that people from ethnic minority backgrounds are hit harder by COVID-19</p>	<p>vulnerable high-risk staff who may need it; this might include providing shopping or medicines where they are unable to gain support from elsewhere</p> <ul style="list-style-type: none"> <li>• All reviews of staff roles and safety should be non-discriminatory and take into consideration equality considerations and protected characteristics as defined under the Equality Act 2010, e.g. disabled staff</li> <li>• Reasonable adjustments must be made to avoid disabled workers being put at any disadvantage</li> <li>• Managers should refer to existing policies regarding new and expectant mothers, e.g. entitlement to suspension on full pay if suitable safe roles cannot be found</li> </ul>
---	---

Staff Health and Operational Staffing Levels					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<p>Staff may get sick with coronavirus infection</p> <p>People who have symptoms must “self-isolate” at home for 7 days from the start of symptoms to prevent them from passing the infection on and contributing to the overload on the NHS</p> <p>Those who live with others and where one person has symptoms must self-isolate as a household for 14 days from the day when the first person in the house became ill. If anyone else in the household starts displaying symptoms, they need to stay at home for 7 days from when the symptoms appeared, regardless of what day they are on in the original 14-day isolation period</p> <p>Those who are considered extremely vulnerable are advised to “shield” themselves at home</p>	<p>The following safety arrangements should apply to staff health or staffing levels:</p> <ul style="list-style-type: none"> <li>• Staff who are considered extremely vulnerable or high-risk should not be expected to attend for work in the workplace – where possible or appropriate they should be furloughed or supported to work from home</li> <li>• Staff who are sick or self-isolating should phone immediately and inform their line-manager – on no account should they attend for work</li> <li>• Make sure that communications go out that no member of staff should come to work if they are self-isolating or if they have COVID-19 symptoms or if they feel unwell</li> <li>• Staff may be reallocated from non-essential parts of the organisation to essential functions or may be subject to furlough arrangements</li> <li>• Managers should consider temporary departmental closures or operational adjustments if staffing is reduced to unsafe levels</li> </ul>

Premises Access and Travel					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<ul style="list-style-type: none"> <li>• Travel to and from work may lead to greater risk of virus transmission</li> <li>• Public transport may be restricted in order to achieve social distancing on trains, buses, etc.</li> <li>• Access to buildings may create a virus transmission risk if staff all seek entrance at once or are channeled through single points of entry</li> <li>• Risks may be increased for disabled staff who may have reduced options for access</li> </ul>	<p>The following safety arrangements should apply to workplace access and travel arrangements:</p> <ul style="list-style-type: none"> <li>• Ensure that sufficient access points to the workplace are provided so that staff do not congregate at entrances and exits – ensure that all access points have supplies of sanitizer available</li> <li>• Review disabled access policies and arrangements to ensure safe entrance or exit for disabled staff</li> <li>• Use floor markings and signage at entrances and exits and introduce one-way flow systems at entry and exit points where appropriate</li> <li>• Enable flexible/staggered working arrangements so that staff can avoid travelling at peak times or all arriving or leaving at the same time</li> <li>• Provide hand sanitiser at entrances and exits</li> <li>• Ask staff not to share cars and limit use of any work minibuses, etc</li> <li>• Support staff to walk or cycle to work wherever possible, e.g. providing safe bike storage, showers, lockers, etc</li> <li>• Ask staff not to use public transport if at all possible – where they do use public transport they should conform with all requirements, e.g. wearing face coverings if required, social distancing, etc</li> </ul> <p>In all cases non-essential travel for work purposes should be minimised</p>

Cases of Possible Infection On-site					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<ul style="list-style-type: none"> <li>How high is the risk of transmission?</li> </ul>	<p>If a member of staff becomes unwell in the workplace with coronavirus symptoms (a new, continuous cough or a high temperature) they should be sent home and advised to follow government advice to self-isolate</p> <p>The following actions should be taken within the workplace:</p> <ul style="list-style-type: none"> <li>All surfaces that a symptomatic person has come into contact with must be cleaned and disinfected, especially objects visibly contaminated with body fluids and all potentially contaminated high-contact areas such as toilets</li> <li>Public areas where a symptomatic individual has passed through and spent minimal time, such as corridors, but which are not visibly contaminated with body fluids, can be cleaned thoroughly as normal</li> <li>Cleaning staff should use disposable cloths or paper roll and a combined detergent disinfectant solution at a dilution of 1000 parts per million available chlorine</li> <li>Cleaning staff must wear appropriate PPE</li> <li>Waste from cleaning of areas where possible cases have been (including disposable cloths and tissues) should be “double-bagged” and tied off; it should be placed in a secure holding area for 72 hours before being disposed of in general waste</li> </ul>

Business Continuity and Crisis Management					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<ul style="list-style-type: none"> <li>Ability to deliver essential services to customers and clients</li> </ul>	<p>Managers should refer to business continuity policies and procedures</p> <p>After lockdown the following safety arrangements should be applied to establish business recovery:</p> <ul style="list-style-type: none"> <li>Establish overall coronavirus risk management team</li> <li>Ask all departments to review and refresh business continuity plans as necessary</li> <li>Devise appropriate business recovery plans and keep under constant review</li> </ul>

Information and Communication					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<ul style="list-style-type: none"> <li>Lack of information</li> <li>Inaccurate information</li> </ul> <p>The pandemic has been accompanied by a large amount of official guidance, some of which needs interpretation, and also by misinformation, rumour and “fake news” or “myths”. If these are allowed to gain traction within the organisation they can obscure and confuse vital health and safety measures.</p>	<p>After lockdown the following safety arrangements should be applied to mitigate risks caused by misinformation and “fake” news:</p> <ul style="list-style-type: none"> <li>To ensure the safety and wellbeing of staff business strategies must be based on accurate information and staff must be given consistent, simple and clear messages</li> <li>Coronavirus risk management team to monitor official advice carefully and update all policies and procedures</li> <li>Ensure leadership teams/local managers are briefed and kept up to date</li> <li>Managers to beware fake news and discourage the circulation of misinformation</li> <li>Keep staff informed – key messages include the need for unwell staff or homeworking staff to stay at home, for frequent handwashing and for social distancing</li> </ul>

Cyber Security					
What are the hazards?	Who might be harmed and how?	Controls required (including existing measures and new requirements)	Action by who?	Action by when?	Date completed

Potential risks:	Possible control measures:
<p>Cyber-security threats often accompany a crisis, including computer viruses, phishing and scam emails and coronavirus related “ransomware”</p> <p>With the organisation and individual staff more reliant than ever on digital communications and the internet, and with more staff working from home and using a variety of digital devices, the need to ensure the security and function of our digital systems is more important than ever</p>	<p>The following safety arrangements should be applied to mitigate cyber risks:</p> <ul style="list-style-type: none"> <li>• Review cyber security and surveillance infrastructure and ensure that all reasonable protection is in place</li> <li>• Circulate warnings to staff and managers of any credible cyber threats, especially scam emails and text messages</li> <li>• Ensure that staff working from home and using remote-working systems are covered by cyber-risk protections</li> <li>• Ensure any homeworking arrangements maintain standards of data protection and IT security</li> <li>• Ensure that existing cyber-security systems do not interfere with the availability of critical safety information and updates relating to coronavirus</li> <li>• Assess cyber risks to new supply chain connections developed during the crisis</li> </ul>
